- NodeJS
- ExpressJS
- ReactJS

Other Technologies
- NextJS
- GraphQL
- Redis

Recent Projects:

- OnePush, a web app for posting blogs to multiple platforms at once.
    - https://onepush.blog
    - https://github.com/S3Prototype/onepush

- BuddyViewer, a web app for simultaneously watching YouTube videos with friends.
    - https://buddyviewer.com
    - https://github.com/S3Prototype/BuddyViewer/

- NecronomiSearch, a web app for searching through the back catalog of H.P. Lovecraft.
    - https://necronimsearch.com
    - https://github.com/S3Prototype/necronomisearch

Professional Experience

Graphic Design Contractor   **2017 – Present**

As a contracted designer, it was my job to handle all aspects of the business. This included acquiring customers, working with them to determine their needs, and providing them with market-ready, professional end-products.

- Sought out customers through cold-calls, emails, and advertisements.
- Communicated back and forth with customers until their requirements were clear and the project could be started.
- Worked with customers to adjust each draft in the process to their desires.

- Produced web presences for clients, including social media images, album cover arts, and promotional posters.
- Used Adobe Photoshop, Adobe Premiere and Adobe After Effects

Video Editing/Direction Contracting
2017 – Present

As a contracted video editor and director, I had to handle production tasks at all levels of the process. This included storyboarding, location-searching, equipment management, video direction, video editing, and other major skills.

- Discovered and acquired customers through active cold-calls, emails and advertisements.
- Worked with customers to plan shooting schedules, video concepts and budgets.
- Negotiated permission to film at various locations.
- Directed and filmed all videos personally.
- Edited videos to customer-specified requirements.
- Worked in Adobe Premiere, Adobe After Effects, and Adobe Photoshop.

Retail   **2012 – 2017**
Walgreens

As a ship supervisor for Walgreens, I juggled many different roles. This often occurred at an understaffed location where I had to react to situations immediately, autonomously, and appropriately.

- Guided customers through finding good discounts and deals to maximize their purchases.
- De-escalated situations with stressed customers and resolved their issues.
- Organized stock rooms and shelves for efficiency and cleanliness.
- Handled high volumes of customers during peak-traffic hours.

Education and Training

Education:

2018 - **Present** Computer Science Degree, William Paterson University (Incomplete - Academic break due to family health and financial issues)

Other
- **Fluent in Japanese**
- **Published author**
- **YouTuber**
